OBJECTIVE

As a former paramedic/firefighter and a self-taught front-end developer, my goal is to leverage my unique skillset and experiences to transition into the industry as a full-time front-end developer. With four years of freelance experience, I have developed a strong foundation in various front-end frameworks and languages. I am eager to apply my problem-solving skills, attention to detail, and ability to work under pressure to a dynamic team environment. I strive to continue learning and growing as a developer, while delivering high-quality code that meets or exceeds expectations. I am excited about the prospect of joining an innovative and collaborative team, where I can contribute my expertise and passion for front-end development to help drive business success.
